

Tour Mining Project

TOUR RECOMMENDATION BY USING SNN NETWORK BASED ON USER INTEREST

ANAWAT KAENTHONG

Presentation Outline

- ▶ Introduction
- ▶ Purpose
- ▶ Goal
- ▶ Progress
- ▶ Expected Result

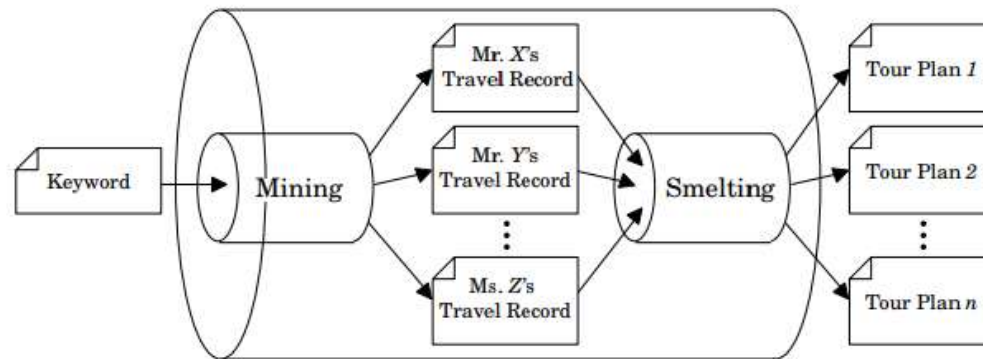

Introduction

- ▶ Nowadays people often post travel records on SNS such as Twitter Facebook Instagram
- ▶ So if we use travel records that people post on SNS as reference to create better tour plan for people who want to go to similar trip

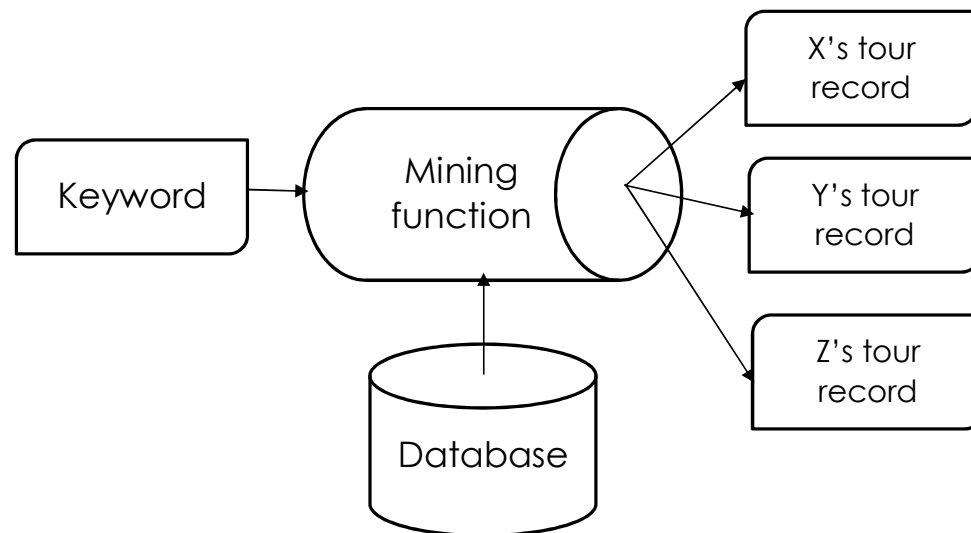

Purpose

- ▶ Generate tour plan from input keyword
- ▶ Separated into two functions Mining function and Smelting function

Goal

- In this project we will try to implement Mining function of the program

Progress

- ▶ We use twitter api to mine data from twitter
- ▶ And then use geolocation from twitter and google api to get the location of user at that time
- ▶ Use all location that we get to crate travel record

Expected Result

- Webpage for user to input keyword and web will show travel record associate with input keyword
